DERMAFLEECE MASKS

- **The formation of new collagen fibers is promoted**
- **Moisturizing and moisture retaining**
- **Inhibits destructive, harmful enzymes**
- **Strengthens the skin's native resilience**
- **Visible improvement of the skin structure**
- **Improvement in the resilience, elasticity and suppleness of the skin tissue**

Application

Following skin cleansing and the application of an active substance concentrate, place Collagen Caviar Extract onto the non-oily area of skin which is to be treated, preferably moisten with Mask Activator and allow to work in for approx. 20-30 minutes. Finally, peel the mask off in one piece. Gently press in any moisture remaining on the surface of the skin.

The treatment can be continued with a massage cream, cream mask and/or concluding care.

Note: Always store Collagen Caviar Extract in the sealed packaging at room temperature; protect against moisture and direct exposure to sunlight.

Collagen Caviar Extract

FLEECE MASK FOR SKIN REGENERATION

Ideal for dull, limp and lifeless skin which tends to react sensitively at the same time. In addition to wrinkles caused by dryness, the skin often appears tired and lifeless.

During the aging process, destructive enzymes (so-called collagenases) act on the skin's connective tissue. These enzymes literally destroy the skin's collagen network. The result is a significant loss of skin resilience and elasticity. The lack of tissue tone is also responsible for the fact that the facial contours appear tired and lifeless.

The Collagen Caviar Extract fleece mask has a moisturizing effect, protects the collagen and elastic fibers and clarifies the facial contours, leaving the skin looking velvety. This active substance additive, obtained from the water-soluble extract of caviar, has a high content of amino acids and sugar compounds. Both are essential constituents of an intact skin metabolism.

ACTIVE SUBSTANCES

- **Collagen:** Moisturizing and moisture-binding, lifts the skin
- **Caviar extract:** Active substance of biomarine origin, stimulates the formation of new cells, ideal radical scavenger, promotes the skin's microcirculation
