FACIAL CREAM MASKS

- **Intensive care mask**
- **Dissolves dead skin cells**
- **Promotes a fresh appearance**
- **For more even skin**
- **Prevents blemishes such as e.g. blackheads**
- **Moisturizing and moisture retaining**
- **Lends the skin a silky-matte, even appearance**

Fruit Peel Cream Mask

CREAM PACK FOR OILY SKIN

Clear, strong skin is smooth, pure and beautiful.

If a fresh appearance is lacking, the skin is rather more patchy and tends to reveal blemishes, uneven hornification is often the cause.

Fruit acids can help here. These verifiably act like a chemical peeling on the skin. The uppermost horny layer, consisting of dead skin cells, is softened and gently removed. Freshly formed cells appear more quickly on the surface of the skin and immediately ensure a fresher appearance.

Fruit Peel Cream Mask refines the surface of the skin with an exotic mixture of fruit. The slightly acidic pH value (pH 4) inhibits the tendency towards blemishes and inflammation with optimal skin tolerability.

Application

Distribute FACIAL CREAM MASK over the area of skin to be treated following skin cleansing and after applying a serum, and allow it to work in for up to 20 minutes. Remove the mask residues with warm compresses. Then apply a care cream corresponding to the skin type.

Tip: Also ideal for treating the backs of the hands.

Note: Ensure adequate UV protection following each AHA treatment and apply Face Guard (SPF 30) prior to concluding care.

Prevent Fruit Peel Cream Mask from getting into the eyes and avoid contact with mucous membranes.

ACTIVE SUBSTANCES

- **AHA:** Obtained from passion fruits, lemons, pineapples and grapes, alpha hydroxy acid removes dead skin cells, stimulates skin renewal and smoothes the surface of the skin
- **Isostearyl-isostearate:** Shortened to ISIS; emollient based on replenishable raw plant materials; improves the cohesion of the lipids in the Stratum corneum and reduces the skin's trans-epidermal moisture loss
- **Saccharide isomerate:** Moisture retention substance obtained from natural sugars; is firmly bound to the skin's keratin and leads to optimal skin moisturization thanks to its very good moisture-binding capacity
- **Bisabolol:** Aqueous extract of chamomile, alleviates redness and pruritus
