PEEL OFF MASKS

- **Pleasantly cooling**
- **Calms irritated skin**
- **Improves the skin's natural protection mechanisms**
- **Increases the skin's moisture content**
- **Has an anti-ageing effect**

Application

1st step: Protect the customer's hairline (e.g. with paper tissues).

2nd step: Apply an active substance concentrate corresponding to the skin type onto the areas of skin to be treated and press in gently. Allow to work in for a few minutes.

3rd step: Mix the peel off mask. Quickly mix 30 g powder with approx. 90 ml – 110 ml of liquid (Ocean Mineral Activator or water - room temperature) to form a smooth paste.

4th step: Evenly apply the thick mask mixture onto the face and neck or the corresponding areas of the body in upwards strokes using a spatula. Leave out the eyes and mouth (or include them after consulting the customer). Of course, the respiratory tracts always remain free. Allow the mask to work in for 15 - 20 minutes.

5th step: Simply peel the mask off and remove residues with moist mask sponges if necessary.

6th step: Then apply the appropriate care cream.

Note: when the mask hardens, powders residues may occur on the skin in areas in which the mask runs out. To avoid this, simply apply a little care cream along the edges of the mask at the transition to the neck, the hairline and the nostrils.

Aloe De-Stress

PEEL-OFF MASK FOR SENSITIVE SKIN

Aloe De-Stress is a soothing and moisturising mask that revolves around the effect of aloe vera.

The innovative FILMALGINE® basis of the mask (alginate, soya peptides and soya isoflavones) also has an anti-ageing effect.

If the skin is sensitive, undesired skin reactions are never far away. In such cases, it is not only necessary to strengthen the skin's natural protection mechanisms, but to also calm it sustainably and alleviate irritation.

Aloe De-Stress soothes and strengthens the skin with aloe vera and an *Spirulina platensis* extract. Aloe vera is a member of the lily family and has long had a reputation for soothing sensitive skin. The cactus-like plant contains over 200 valuable purely biological substances that supply the skin with moisture, alleviate irritation and support the skin's natural regeneration process.

A *Spirulina platensis* extract complements this effect. The spiral-shaped microalga contains essential amino acids, vitamins, minerals and trace elements, and these valuable substances are able to strengthen the skin's defensive and protective functions impressively.

The reactivity of sensitive skin is reduced gently and safely.

ACTIVE SUBSTANCES

- **Alginate:** Once mixed and dried on, alginate gives these powder masks a firm, elastic consistency (soft peel-off mask). It also moisturises, firms and tightens the skin
- **Soya peptides:** Hold moisture and nourish the skin
- **Soya isoflavones:** Stimulate cell renewal and impede the enzymatic breakdown of collagen
- **Aloe Vera:** Soothes and moisturises the skin
- **Spirulina platensis:** A vitalising cyanobacterium rich in essential amino acids, minerals and vitamins
- **Lavender oil:** Calms the senses
