JANSSEN COSMETICS

AMPOULES

- **Balances the color and structure of the complexion**
- **Moisturizing**
- **Ideal for hyperpigmentation**

Home care application

Distribute Melafadin Fluid gently over the cleansed skin. To do this, break off the top of the ampoule, using a paper tissue as protection, and pour the entire content into the palm of your hand. Then distribute evenly over the face and neck and press in gently. Use Brightening Day Protection in the morning and Brightening Night Care in the evening for the best results.

Regular application for 4 weeks every 2-3 months has proved particularly effective.

During this time, the skin should be protected from direct exposure to the sun. Use of Brightening Day Protection (Ref. 3311) or Face Guard Advanced is optimal.

For external use only.

Tip: For effective "skin brightening in 4 steps", daily skin care should be supplemented with FAIR SKIN cosmeceuticals.

Melafadin Fluid

ACTIVE SUBSTANCE CONCENTRATE FOR BRIGHTER SKIN

Melafadin Fluid is a special concentrate with effective skin brighteners which inhibit melanin synthesis at its very source, block melanin maturation and finally inhibit melanin uptake into the horny layer's cells.

The fluid is particularly suited to use in the evening supporting the FAIR SKIN concept: "Brighten Skin in 4 stages."

With regular application and combination with FAIR SKIN products, dark pigmentation flecks become paler and the skin becomes brighter.

ACTIVE SUBSTANCES

- **Long-chain hyaluronic acid:** Cares for the skin, moisturizes, smoothes
- **Lipoamino acid:** (INCI: undecylenoyl phenylalanine), effective skin brightener, verifiably blocks the α -MSH receptors on the surface of the melanocytes
- **Vitamin C phosphate:** Stabilized ascorbic acid; stable in water; is transformed into free vitamin C on the skin by the skin's native enzymes (esterases); inhibits melanin maturation
- **Plant extract SORR:** Highly-active extract consisting of Siegesbeckia orientalis and Radosia rubescens; inhibits melanin absorption into the keratinocytes, has a soothing and antioxidant effect, promotes an even, radiant complexion
