## BODY

- For an effective massage to stimulate the micro, blood and lymphatic circulation
- The skin tissue is fortified, lifted and firmed
- Promotes the removal of waste products
- Skin-calming
- Massage preparation with outstanding sliding properties
- Natural fragrance for particular well-being

### Application

For a full and partial body massage, apply Body Sculpting Massage "TUSCANY" and massage. Treat the thighs, hips, abdomen and inner sides of the arms particularly intensively.

## Body Sculpting Massage "TUSCANY"

### RICH MASSAGE CREAM (WATER-IN-OIL EMULSION)

Body creams and emulsions offer a particularly light texture. This is an important aspect for daily use at home when rapid and uncomplicated application is required. In contrast, the absence of a rich massage preparation from the salon is barely conceivable.

Body Sculpting Massage "TUSCANY" is a classic massage cream with outstanding sliding properties. It is ideally suitable for carrying out intensive partial or full body massages with the objective of stimulating the micro, blood and lymphatic circulation in such a way that accumulations of fluid are mobilized. The cardiovascular system and lymphatic flow are activated and the body's functions revived in this manner. Unattractive "dimples" disappear; the skin is left looking smooth and supple.

This is supported by the active substance Q10: an outstanding power plant for the skin cells' metabolism.

The natural fragrance of orange oil results in a particularly relaxing effect.

### ACTIVE SUBSTANCES

- **Alpha-bisabolol:** Main active substance of chamomile, alleviates irritation
- **Mango butter:** Oily extract from mango seeds, supplies nutrients, cares for the skin
- **Orange oil:** Balancing and harmonizing in the spirit of aromatherapy
- **Coenzyme Q10:** Antioxidant, activates the cells, skin-smoothing
- **Vitamin C phosphate:** Fortifies the connective tissue, activates collagen synthesis
- **Vitamin E acetate:** Antioxidant
