MEN

- Wash and shave with one product
- Frees your skin from excessive production of sebum
- Prevents irritation caused by shaving
- Moisturising
- Simple application
- Pleasant fragrance

■ Purifying Wash + Shave

WASH AND SHAVE GEL

Practical wash and shave gel for men. When combined with warm water, it produces a luxuriously creamy foam, which is perfectly suited for thorough cleaning and/or shaving.

The new Purifying Wash + Shave gel by JANSSEN COSMETICS was developed for men, who appreciate an easy-to-use product. The cream thoroughly cleanses the skin, while simultaneously enabling a perfect shave. The special 2-in-1-formula, with D-Panthenol, reduces and soothes skin irritation, and leaves skin feeling fresh and relaxed.

D-Panthenol is the precursor (provitamin) to vitamin B5 (pantothenic acid). It is easily absorbed into the skin, moisturises and improves the skin's elasticity. It also aids the formation of new skin cells and thereby contributes to the regeneration of men's strained skin. In addition, D-Panthenol has anti-itch, anti-inflammatory and wound healing properties.

These properties make D-Panthenol an ideal ingredient for this practical and simultaneously nurturing formulation.

A must-have for a neat start to the day!

Application

Lather a small amount of the product in the hands to create a creamy foam, and apply to the face. If using the product for shaving, gently massage it into the beard and allow a short time for it to take effect. Then shave as normal. Wash away any excess product with warm water.

INGREDIENTS

- **Panthenol:** Improves skin regeneration, boosts the skin's natural defences, reduces skin irritation, softens the skin
