Face Sculpture SERUM

Golden-coloured serum

30 ml dropper
50 ml dispenser

Short Description

Lifting serum for firmed facial contours and a youthful appearance.

Skin type

For skin in need of regeneration

Description

Face Sculpture SERUM is a highly-concentrated and thus ultra-active elixir for refining the skin structure and lifting the facial contours. It remodels skin in need of regeneration and firms it from its depths. The product acts where the aging process starts.

Purpose and function

- Refines the skin appearance
- Lifts the facial contours (V-Lift)
- Smoothes lines and wrinkles
- Leaves the skin looking younger

Main active substances:

- **Pentavitin®***: Sustainably improves the skin's moisture retention capacity, as this combination of various sugar compounds binds firmly to the surface of the skin and is not rinsed off during washing. Pentavitin® prevents moisture loss – even under dry environmental conditions.
- **3 D Lifting Peptides**: Elastin-stimulating peptides for stimulating Elastin synthesis in the fibroblasts; firm the connective tissue structure and lift the facial contours.
- **Long- and short-chain Hyaluronic acid**: Produced using biotechnology, it possesses a fill-in effect which „pads out“ the skin from the inside out. The skin is lifted extensively.

Professional Application

Apply 2 -4 drops onto the face, neck and neckline and press gently into the skin. Then apply one of the following masks: **BIOCELLULOSE MASK Age Defying**, **Calming Gel Mask** or **PEEL OFF FILMALGINE® Ultra Comfort Mask**.

Home Care Application

Apply 1 -2 drops onto the cleansed skin of the face and neck in the morning and evening and allow to work in briefly. Then apply **Premium Age Protector/Ultra SPF 30** in the morning and **Face Sculpture CREAM** in the evening.

The efficacy of 3D Lifting Peptides has been confirmed impressively in clinical trials

ELASTIN SYNTHESIS

new Elastin / Tropoelastine:

- Normal humane fibroblasts + 325 %
- Artificially aged skin model + 14,8 %

ELASTIN ENCLOSURE

Determination of the quantity of Elastin / Tropoelastine that has been anchored in the extra cellular matrix: + 94 %

CONCLUSION: considerably more Elastin after the treatment with 3D Lifting Peptides
