Calming Gel Mask

Creamy gel

150 ml dispenser

Short Description

Skin type

Creamy gel mask to calm the skin immediately.

All skin types.

Description

Calming Gel Mask for fast soothing of the reddened and irritated skin. The delicately scented gel develops its soothing cooling effect immediately after application. Any redness, skin irritation, a burning or itchy feeling or small swellings disappear in record time. Especially during a fruit acid treatment, the **Calming Gel Mask** is a valuable support. Proven natural ingredients such as D-Panthenol and Bisabolol soothe the skin quickly and efficiently. Horse Chestnut extract provides an additional vessel strengthening effect, thus mitigating the appearance of small broken capillaries. But the **Calming Gel Mask** is capable to much more! Thanks to the combination of Hyaluronic acid and a moisturizing complex the surface of the skin is visibly smoothed. The moisture depots of the skin are filled, which gives the skin a fresh and firm look. At the same time Vitamin E acetate protects the skin from free radicals and premature wrinkling.

Purpose and function

- Delicately scented gel cream to soothe and calm the skin immediately
- Ideal after the treatment with fruit acids
- Very strong moisturizing and moisture binding
- Soothes redness and itching
- Tangible and visible help for stressed, irritated skin
- Smoothes lines and wrinkles
- Protects the skin from free radicals

Main active substances:

- **D-Panthenol:** Soothes the skin, improves its regeneration activity and leaves a velvety soft feel on the skin.
- **Bisabolol:** Aqueous extract of chamomile, soothes the skin, reduces redness and itching.
- **Horse Chestnut extract:** stimulates blood circulation, relieves venous congestion, strengthens blood vessels.
- **Hyaluronic acid:** To smooth the skin relief - is extremely moisturizing and protecting and has a high water-binding capacity.
- **Pentavitin®***: Sustainably improves the skin's moisture retention capacity, as this combination of various sugar compounds binds firmly to the surface of the skin and is not rinsed off during washing. Pentavitin® prevents moisture loss – even under dry environmental conditions.
- **Vitamin E acetate:** Radical scavenger, preventive cell protection, combats premature skin aging.

Professional Application

Apply liberally with a brush or with hands over face, neck and décolleté and leave on for about 15 minutes. Wash off excess with a wet compress.

Tip

Makes an excellent soothing care gel if your skin is irritated by external factors such as sun, cold or wind. Just thinly spread on clean skin and massage gently.
