FACIAL CREAM MASKS

- **Moisturising**
- **Reduces dryness lines**
- **Alleviates feelings of tightness**
- **Kind to the skin**
- **Strengthens natural skin barrier**

Application

After cleansing skin and applying an active agent concentrate, spread Hydrating Cream Mask over the area of skin to be treated and leave to take effect for up to 20 minutes. Remove mask residue with hot compresses. Then apply a skin care cream suited to the skin type.

Tip: ideal for treating the back of the hands too.

Hydrating Cream Mask

RICH CREAM MASK FOR OIL- AND MOISTURE-DEFICIENT SKIN

Beautiful, supple skin in an instant? No problem – rich Hydrating Cream Mask delivers a dose of ultra-efficient moisturising and nourishing lipids to dry, oil- and moisture-deficient skin. Results felt immediately.

The powerful creamy formula features the amazing Hydro Express Complex, an innovative moisture complex that forms an invisible, undetectable yet effective molecular network across the skin, protecting it against drying out. The network is made up of hyaluronic acid, alginate and pullulan and carries a moisture complex that is continuously released into the skin. Clinical tests have proved the effectiveness of Hydro Express Complex. Just 30 minutes after application, skin moisture increases 25%, remaining for up to 48 hours.

A combination of ISIS and avocado oil supports the skin's barrier function, giving the skin long-lasting protection against moisture loss.

The result? Skin is intensely moisturised, becoming supple and free of unpleasant feelings of tightness.

ACTIVE SUBSTANCES

- **Hydro Express Complex:** Molecular network of natural biopolymers (hyaluronic acid, alginate and pullulan) with ultra-concentrated moisturising active ingredients (glycerin, serin, trehalose, urea). Active ingredients are gradually released into the stratum corneum. Proven effectiveness of Hydro Express Complex: immediate improvement – increases skin moisture by 25% just 30 minutes after application Long-lasting protection – up to 48 hours' hydration after just one application. Enhanced moisture retention capacity – skin moisture lasts up to 5 days longer after application
- **Avocado oil:** Moisturising; nourishes, smooths and regenerates skin, supports the skin's natural barrier characteristics
- **ISIS:** Nourishing oil with special structure. Clinical studies show that it blends with intercellular lipids, providing support and strengthening the skin's barrier function. This reduces transepidermal water loss (TEWL) and the skin retains more moisture
