# JANSSEN COSMETICS

## COMBINATION SKIN

- **Moisturizing and moisture-retaining**
- **Refines the pore profile**
- **Reduces and normalizes excessive sebum production**
- **The skin's natural balance is restored**
- **Leaves the skin looking clear and matte**
- **Leaves the skin feeling smooth and soft**
- **Creases caused by dryness are reduced**

## Balancing Cream

### BALANCING CARE CREAM

Even if they only occur partially, as in the case of combination skin, oily areas of skin are often equally as unpopular as the increased tendency to develop blemishes. Particularly in this case, gentle but specific care is required to balance combination skin, so that large pores and blackheads are unable to gain a "foothold" in the first place and the skin's natural balance is restored.

Balancing Cream is a modern care cream with a particularly light texture. It is rapidly absorbed into the skin, where it verifiably leads to increased moisture.

However, the special feature of this care cream is the active substance of a sugar-like ingredient which is obtained from rice bran. Scientific studies have clearly proved that this unique natural substance is able to reduce the lipid content of greasy areas of skin and to increase it in dry areas. And all of this within only five weeks.

Thanks to this perceptible and visible effect, Balancing Cream normalizes the dry and greasy areas of combination skin during daily application with just one cream.

### Home care application

Regularly massage gently into the skin in the morning and/or evening after cleansing with Gentle Cleansing Powder.

**Tip:** Also outstanding suitable as a foundation for make-up.

### ACTIVE SUBSTANCES

- **Sugar-like substance from rice bran:** Balances the lipid content of dry and greasy areas of skin
- **Red algae extract (Condrus crispus):** Moisturizing
- **Aloe vera:** Soothing and skin-clarifying
- **Fine polyamide powder:** Porous, round spheres; microfine; absorb surplus sebum and leave the surface of the skin looking matte
