SENSITIVE SKIN

- **Light, additional care for very sensitive, stressed skin**
- **Regenerates and strengthens the skin's natural protective barrier**
- **Calms the skin and reduces redness**
- **Provides long-lasting moisture**
- **Makes the skin more resistant to external irritants**

Home care application

Apply morning and evening to cleansed skin and massage in gently. Then apply our Intense Calming Cream on top. Avoid the eyes.

Recommendation: Sensitive skin and sunlight are not a good mix. Face Guard Advanced provides optimal sun protection. The feather-light emulsion lays gently on the skin and reflects UV radiation. Simply apply Face Guard Advanced daily over the Intense Calming Serum. Then use the Intense Calming Cream.

Intense Calming Serum

LIGHT, ADDITIONAL CARE FOR IRRITATED SKIN

Intense Calming Serum is a light, nourishing serum for very sensitive and irritated skin. It is ideal for enhancing the effects of the Intense Calming Cream.

The Skin Defense Complex⁺ made of black currant seed oil, balloon plant extract and concentrated sunflower oil supports and regenerates the skin's barrier function. In addition, the highly concentrated complex reduces inflammation and strengthens the skin's resistance to external irritants*. The complex is enriched with barrier-strengthening isostearyl isostearate (ISIS) and the anti-inflammatory ingredients panthenol, allantoin and α -bisabolol. Hyaluronic acid and saccharide isomerate moisturise and protect for 72 hours.

The result? Intense Calming Serum effectively soothes irritated skin and leaves the skin feeling relaxed.

ACTIVE SUBSTANCES

- **Skin Defense Complex⁺:** A highly active phyto complex made from **black currant seed oil** (rich in omega-3 and omega-6 fatty acids, reduces inflammation and repairs the skin's barrier function), **balloon plant** (rich in phytosterols, considered a herbal alternative to hydrocortisone and reduces inflammation) and the unsaponifiable parts of **sunflower oil** (rich in essential fatty acids; protects and restores the damaged skin barrier and reduces allergic reactions)
- **α -Bisabolol:** Soothing, anti-inflammatory, relieves irritation
- **Allantoin:** Soothes the skin, reduces redness
- **D-Panthenol:** Provides moisture, supports the skin's natural regenerative properties
- **Long-chain and short-chain hyaluronic acid:** Intensively moisturises and protects
- **Isostearyl Isostearate:** An emollient derived from raw plant-based materials, clinical studies have shown that it integrates into the intercellular lipids and thus strengthens the barrier function of the skin
- **Saccharide Isomerate:** A skin-identical carbohydrate complex for long-lasting hydration of the skin; 72-hour long-term effect by permanently binding to the keratinocytes of the stratum corneum
