Retinol Lift

CAPSULES WITH RETINOL FOR SKIN REGENERATION

Retinol Lift works specifically to fight against fine lines and wrinkles, improves skin elasticity and gives you a fresh, even complexion. Each individual capsule contains a highly effective combination of retinol and vitamin E acetate for pampering the skin, all embedded in a formula of valuable oils.

Retinol is one of the longest used and best studied active ingredients for anti-aging. It promotes the production of new skin cells, stimulates collagen formation and regenerates minor skin damage caused by UV radiation, for example. Usually, retinol is sensitive to air, heat and light – however, the capsule technology used protects the retinol from external influences so that its effectiveness is guaranteed in every application.

Efficacy studies confirm that Retinol Lift, when used regularly, reduces lines and wrinkles by 15%, increases skin elasticity by 12% and improves firmness by 14.5%, while improving skin radiance by 22.2% at the same time. The appearance of the skin is refined while lines and wrinkles are reduced as well as age and pigment spots.

The formula is free of fragrances and preservatives and is very well tolerated by the skin.

ACTIVE SUBSTANCES

- **Retinol:** Retinol is known for its ability to support the natural regeneration of the skin and stimulate the synthesis of collagen fibers. As a very effective form of vitamin A, it helps the skin to gain elasticity and makes it more radiant
- **Vitamin E – Acetate:** Helps protect the skin from free radical damage

Home care application

It is better to apply Retinol Lift in the evening before the respective care cream. Twist or cut the capsule neck to open it. Squeeze the contents out of the capsule and spread over the skin using your fingertips. When doing this, pay special attention to lines and wrinkles and gently massage the delicate texture into the skin. For external use only.

Do not use directly under the eyes or on the eyelids.

Do not use in combination with other retinoid products.

Some people may experience a slight tingling sensation or reddening of the skin after using retinol products. This is normal and indicates that the product is working. If you prefer, you can wait a few days between applications to give the skin time to get used to the product. Discontinue use if symptoms are severe or persistent.

In addition to your daily evening application, we recommend that you use Face Guard Advanced during the day to protect the skin against UV radiation.
