## SENSITIVE SKIN

- **Balanced 24-hour care**
- **Regenerates and strengthens the skin's natural protective barrier**
- **Calms the skin and reduces redness**
- **Makes the skin more resistant to external irritants**
- **Increases the skin's moisture content**
- **Is also suitable as a massage cream**

## Intense Calming Cream

### SOOTHING DAY AND NIGHT CREAM

Intense Calming Cream is a 24-hour treatment for sensitive skin prone to redness. Its gentle formula nourishes and protects the skin during the day and supports regeneration at night. Ideally, you should use the cream in combination with the Intense Calming Serum.

The Skin Defense Complex<sup>+</sup> made of black currant seed oil, balloon plant extract and concentrated sunflower oil supports and regenerates the skin's barrier function. Its combination with natural alpha bisabolol and allantoin ensures a significant reduction in inflammation and a noticeable improvement of the skin's condition. Saccharides isomerate and hyaluronic acid moisturise and help to regulate the skin's hydration.

The result? It provides long-lasting relief from symptoms of sensitive or irritated skin. Unpleasant feelings of tightness and itching are alleviated. The skin is soothed and balanced. The skin feels supple and relaxed.

### Home care application

Apply Intense Calming Cream to the face, neck and neckline in the morning and/or evening after the Intense Calming Serum.

**Recommendation:** Sensitive skin and sunlight are not a good mix. Face Guard Advanced provides optimal sun protection. The feather-light emulsion lays gently on the skin and reflects UV radiation. Simply apply Face Guard Advanced during the day before the Intense Calming Cream.

### ACTIVE SUBSTANCES

- **Skin Defense Complex<sup>+</sup>:** A highly active phyto complex made from **black currant seed oil** (rich in omega-3 and omega-6 fatty acids, reduces inflammation and repairs the skin's barrier function), **balloon plant** (rich in phytosterols, considered a herbal alternative to hydrocortisone and reduces inflammation) and the unsaponifiable parts of **sunflower oil** (rich in essential fatty acids; protects and restores the damaged skin barrier and reduces allergic reactions)
- **Long-chain and short-chain hyaluronic acid:** Intensively moisturises and protects
- **Shea Butter:** Nourishes the skin and supports its barrier function
- **Isostearyl Isostearate:** An emollient derived from raw plant-based materials, clinical studies have shown that it integrates into the intercellular lipids and thus strengthens the barrier function of the skin
- **Squalane:** Similar to natural skin lipids; prevents dehydration (water loss), smooths the skin
- **Saccharide Isomerate:** A skin-identical carbohydrate complex for long-lasting hydration of the skin (72-hour long-term effect)
- **α-Bisabolol:** Soothing, anti-inflammatory, relieves irritation
- **Allantoin:** Soothes irritated skin and prevents redness
- **Vitamin E acetate:** Protects cells from damage by free radicals
