

# GOODNIGHT LIP MASK

## SMOOTHING AND REGENERATIVE LIP CARE

Whilst facial skin contains over 20 layers of dead skin (the horny layer), lip skin only comprises of 3-5 layers. Additionally, it lacks the protective outer horny layer and, unlike the rest of the skin, has no moisturising sebum and sweat glands. Therefore, it loses moisture faster. This leads to visible wrinkles and fine lines on the edges of the lip as well as brittle lips. The Goodnight Lip Mask provides the lips with nourishing agents at night, when the skin is particularly busy with regeneration and collagen build-up and repair mechanisms are running at full speed.

The rich lip treatment is applied in the evenings and stays on the skin overnight. The Goodnight Lip Mask contains valuable, plant-based lipids that melt to form a silky protective film when applied to the lips. Shea butter, sunflower wax, and candelilla wax soften the delicate lip skin noticeably and protect it from moisture loss. Cottonseed oil and linseed oil provide the skin with essential fatty acids and vitamins. Enriched with paracress extract and hyaluronic acid, the mask also smooths the skin in the adjacent upper lip area.

The result: Dry, brittle lips get an irresistible, silky smoothness overnight. The lips are moisturised and appear more plump.
