MATURE SKIN

- Unique cleansing experience
- innovative texture for maximum make-up removal, yet also suitable for sensitive skin
- Provides and maintains moisture
- Leaves skin feeling silky
- Suitable for sensitive skin
- Multiple application options

Home care application

Apply and gently massage-in a hazelnut-size quantity of the balm to any dry skin on your face, neck and décolleté to remove make-up. Moisten your fingers and massage the skin again. Finally, remove using warm water.

Tip: *Multi Action Cleansing Balm combines four application possibilities in one product; it is suitable as a cleansing balm, make-up remover, moisturising mask and as an SOS balm for areas of particularly dry skin.*

As a mask: *Apply to cleansed skin and allow it to take effect for 5-10 minutes. Massage with circular movements and then rinse off with plenty of warm water. The mask can also be applied overnight. For this, any excess is dabbed off with a soft cloth, and the mask not washed off with warm water until the next morning.*

As an SOS balm: *In the winter, or if your skin is feeling particularly dry, a small amount of the balm is applied and gently massaged-in to the dry skin. Gently dab away any surplus balm with a soft cloth.*

ACTIVE SUBSTANCES

- **Murumuru Butter:** is extracted from the seeds of the reddish-orange fruits of the Murumuru palm (*Astrocaryum murumuru*) which is native to the Amazon. The plant butter has a unique composition of essential fatty acids and forms a protective film on the skin
- **Apricot Kernel Oil:** is nourishing oil from the apricot kernels (*Prunus armeniaca*). Rich in unsaturated fatty acids and very easy on the skin; it also protects the skin from drying out
- **Evening Primrose Oil:** contains a very high percentage of gamma-linolenic acid which strengthens the barrier function of the skin
- **Raspberry Stem Cell Extract:** oil-soluble extract from the stem cells of raspberries. Contains a high proportion of carotenoids, lipids, phenolic acid and ellagitannin thanks to the unique stem cell technology. These active substances have particular antioxidant and moisturising properties
- **Vitamin E:** is an antioxidant
