SENSITIVE SKIN

- Quickly soothes acutely irritated skin
- Reduces redness
- Regenerates and strengthens the skin's natural protective barrier
- Rich and soothing consistency
- Noticeably relaxed, soft skin
- Ideal as an overnight mask

Home care application

As needed, preferably in the evening, apply to cleansed skin and let it absorb for 15 mins. Remove excess product with moist compresses or gently massage in and leave to work.

Tip: You can fight fires with more than just trucks! For rapid soothing of spontaneous skin reactions such as redness, apply a good amount of Instant Soothing Mask and give it enough time to be fully absorbed by the skin. Then gently remove surface residue and leave the rest on overnight.

* Efficacy study with Fucogel® Powder

Instant Soothing Mask

SOS CREAM MASK FOR IRRITATED SKIN

Instant Soothing Mask relieves irritation, redness and tightness in no time. The pleasant creamy texture ensures visible care results and a lasting effect. If applied before going to bed, the mask pampers and nourishes intensively.

Fucogel® Powder, a biotechnologically-derived high-molecular polysaccharide, has been shown to reduce redness after only 5 minutes*. The highly active phyto complex of black currant seed oil, balloon plant extract and concentrated sunflower oil supports the effect. It regenerates the skin's barrier function, reduces inflammation and strengthens the skin's resistance to external irritants. At the same time, isostearyl isostearate (ISIS for short) supports the skin barrier by integrating with the intercellular lipids. Allantoin soothes irritated skin and prevents redness. Saccharide isomerate moisturises and protects for 72 hours.

The result? A well-balanced, soothed and relaxed skin complexion.

ACTIVE SUBSTANCES

- **Fucogel® Powder:** A high molecular polysaccharide consisting of L-fructose, D-galactose and galacturonic acid; forms a protective film on the skin and provides an instant soothing effect
- **Skin Defense Complex⁺:** A highly active phyto complex made from **black currant seed oil** (rich in omega-3 and omega-6 fatty acids, reduces inflammation and repairs the skin's barrier function), **balloon plant** (rich in phytosterols, considered a herbal alternative to hydrocortisone and reduces inflammation) and the unsaponifiable parts of **sunflower oil** (rich in essential fatty acids; protects and restores the damaged skin barrier and reduces allergic reactions)
- **ISIS (Isostearyl-Isostearate):** An emollient derived from raw plant-based materials, clinical studies have shown that it integrates into the intercellular lipids and thus strengthens the barrier function of the skin
- **Allantoin:** Soothes irritated skin and prevents redness
- **Saccharide Isomerate:** A skin-identical carbohydrate complex for long-lasting hydration of the skin; 72-hour long-term effect by permanently binding to the keratinocytes of the stratum corneum
