MATURE SKIN

- Combats various signs of skin ageing overnight
- Gives you visibly more beautiful skin in the morning
- Care concentrate in a light gel emulsion
- Visibly improves the structure and firmness of the skin
- Radiance and improved luminosity give a special fresh and youthful appearance

Night Recovery Serum

REGENERATING ANTI-AGEING SERUM FOR THE NIGHT

Night Recovery Serum with Cellular Regeneration Complex supports the nightly repair mechanism of the skin. Rejuvenation of the skin is boosted and the moisture content of the skin improved over the long-term. Thanks to night-time intensive regeneration, the skin looks relaxed, moistened and small lines and wrinkles appear visibly reduced.

The high-performance active ingredients of the Cellular Regeneration Complex – called CRC for short – ensure a comprehensive regeneration of mature skin and strengthen the skin's structure. Red clover extract has been shown to reduce wrinkles, tighten the skin and moisturise. Kombucha, a multi-active ingredient from fermented black tea, improves the radiance. Recent studies show that Kombucha can stimulate the development and maturation of the fat cells in the skin and thus acts as a natural lipo-filling.

Silk acacia extract promotes the visible reduction of the signs of fatigue. It helps to protect and repair the skin from protein damage caused by glycation (saccharification). In addition, short and long-chain hyaluronic acid provides intensive moisture. Plant stem cells from the alpine rose strengthen the skin barrier.

For fast and visible results, the serum should be combined with your regular care routine in the evening.

Home care application

In the evenings, apply Night Recovery Serum to the cleansed skin of the face and décolleté. You can then apply your usual care cream over it.

Tip: Before the usual eye contour care, Night Recovery Serum can be applied right up to the eyes.

ACTIVE SUBSTANCES

CRC (Cellular Regeneration Complex):

- **Red Clover Extract:** Rich in isoflavones, reduces creases, firms the skin, moisturises
- **Kombucha:** Fermented black tea, smooths the skin thanks to the lipo-filling effect, improves radiance and gives a rosier complexion
- **Silk Acacia Extract:** Extract from the bark of the Persian silk acacia (*Albizia Julirissin*), helps to prevent the signs of tiredness on the skin (dull complexion, taut facial features)
- **Plant Stem Cells from the Alpine Rose:** Strengthen the skin and make it more resistant to environmental stress
- **Long and Short-Chained Hyaluronic Acid:** Moisturising and binding. Ideal for mature skin which is showing traces of fine creases
